Junior Front-End developer with experience in Firebase. In March 2020, I joined Re:Coded Front-end Development Bootcamp and learned various frontend technologies: HTML, CSS, JavaScript, ReactJS, React-Bootstrap. Taking advantage of technological, analytical and problem-solving skills to develop innovative, high-speed websites, applications and platforms.

TECHNICAL PROJECTS

Health E-commerce - [GitHub](#)

It aims to enhance the health of everyone by both strengthening the understanding of healthy life and providing healthy products.

- +Used Firebase to store the data for each user and to add authentication, also
- +Worked with Wordpress as our CMS for non technical people.

Thinking hats - [GitHub](#)

Six Thinking Hats and the associated idea parallel thinking provide a means for groups to plan thinking processes in a detailed and cohesive way, and in doing so to think together more effectively.

- +Used ReactJS to build the website, also
- +Applied Material UI to design the website, also
- +Worked with Firebase to store the data and to add authentication.

MovieApp - [GitHub](#)

Fully responsive movie app for browsing movies and actors.

- +Used HTML, CSS & JS. Used the TMDB API for getting the data, then rendered this data to the screen.
- +Worked with vanilla javascript to use this data and render it.
- +Learned a lot about APIs and how to use them. Learned about how to handle APIs requests and responses and how to render different views with different data.

TECHNICAL SKILLS

JavaScript / TypeScript, ReactJS, TypeORM, PostgreSQL, NestJS, HTML, CSS, Firebase, Figma, Bootstrap, Git and Github
